NOTICE FUI

International Entrance Examinations 2018

Admission requirements

- Candidates must be under 25 year of age on January 1st, 2018.
- Candidates must have completed at least 2 of undergraduate studies in Science
- Excellent skills in Mathematics and Physics are keys to success
- Candidates cannot be French citizens
- Candidates cannot apply more than once
- Candidates cannot have been enrolled in French preparatory classes for Grandes Ecoles, neither any preparatory program for an engineering school within a French university, nor any French Grande Ecole and the final year of a Master's degree or in a doctoral program.
- Candidates must meet the medically defined criteria of physical fitness (for Ecole Polytechnique)

No knowledge of the French language is necessary to apply. The full application process as well as the examinations can be conducted in English.

Initial selection for entrance examinations

The initial selection is based on academic records, motivation letter from the candidate and letters of recommendation from professors at your university or college.

Entrance examinations

- The final selection is based on results from written and oral exams in mathematics, physics and a general scientific knowledge.
- International examination centers are set up worldwide for the autumn and the spring session in many countries such as for example Brazil, Canada, China, France, Russia, Senegal, Singapore or the USA.

The exams consist of five mandatory tests:

- two written exams in Mathematics and Physics (2 hours each)
- an oral examination in Mathematics (1 hour)
- an oral examination in Physics (1 hour)
- an oral examination in General Scientific Knowledge (45 min): an interview focusing on the analysis of scientific documents (30 min) and the candidate's motivation (15 min). This oral examination is preceded by a 30 min preparation period.

As already stated, examinations can be conducted in French or in English and will be organized in the country of the candidates or the nearest most convenient country with an examinations centre.

An average ranking is established for each candidate having undergone all the tests given the following **coefficients** assigned to each type of examination:

For written exams:

- 3 in Mathematics
- 2 in Physics

For oral exams:

- 6 in Mathematics
- 4 in Physics
- 2 in General Scientific Knowledge and motivation

The total coefficients will be 17 given 5 for the written examination and 12 for the oral examination.

The admission

The aim of our selection process is to rank by order of merit the candidates who are qualified to benefit from an education at one of our schools or university. The admission jury determines the list of admitted candidates.
